PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience designing and building scalable distributed systems using MERN stack technologies. Strong expertise in system design, REST APIs, microservices architecture, and real-time applications. Proven track record of improving system performance by up to 40% through caching, database optimization, and architectural improvements. Experienced in cloud deployments on AWS and Azure with containerized infrastructure using Docker.

TECHNICAL SKILLS

Backend: Node.js, Express.js, Microservices Architecture, REST APIs

Frontend: React.js, React Native (Expo), JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Databases: MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3, CloudFront, SES), Azure App Services, Docker, Kubernetes (Basics)

Testing: Jest, Mocha, Sinon

Tools: Git, Bitbucket, Jira, Camunda BPM

Core: System Design, WebSockets, Authentication, API Optimization, Agile Development

PROFESSIONAL EXPERIENCE

ITC Infotech, Gurgaon

Senior Software Engineer | Oct 2022 – Present

Project: Data Exchange Platform (Enterprise Distributed System)

- Designed and developed scalable microservices architecture for enterprise data workflows
 - Built and optimized 15+ REST APIs handling high-volume transactional data
 - Developed React-based frontend modules for real-time data visualization and monitoring
 - Improved system performance by 30–40% using Redis caching and MongoDB optimization
 - Designed MongoDB schemas and aggregation pipelines for large-scale datasets
 - Implemented real-time communication using WebSockets for live system updates
 - Integrated Camunda BPM for workflow orchestration and business process automation
 - Containerized services using Docker and deployed on Azure App Services for high availability
-

Photon Interactive Pvt Ltd

Senior Software Engineer | Apr 2022 – Sep 2022

Project: HP ARIZE (Healthcare Management Platform)

- Developed backend services using Node.js and Express.js
 - Built REST APIs integrated with frontend systems
 - Implemented SendGrid for automated email notifications
 - Improved system reliability using unit testing (Mocha, Sinon)
 - Worked in Agile environment with cross-functional teams
-

CodeBasera Technologies

Senior Software Engineer | Feb 2020 – Apr 2022

Project: Mera Samaj (Social Networking Platform)

- Built scalable backend services for social networking features
 - Developed modules for user profiles, feeds, notifications, and engagement systems
 - Designed MongoDB-based data models for high user interaction workloads
 - Managed AWS infrastructure (EC2, S3) for deployment and scaling
 - Optimized backend performance for growing traffic demands
-

YellowDunes Services Pvt Ltd

Software Engineer | Sep 2018 – Jan 2020

Projects: RD Collection App & Vehicle Management System

- Built full-stack applications using Node.js, MongoDB, React.js, and React Native
- Developed mobile applications using React Native (Expo)
- Designed REST APIs and backend systems from scratch
- Deployed applications on AWS and integrated third-party services

PROJECTS

Movie-GPT – AI-Powered Recommendation System

GitHub: <https://github.com/Rohitsaini0444/movie-gpt>

- Built Netflix-style full-stack application with AI-driven recommendations
 - Integrated TMDB APIs with OpenAI GPT for dynamic content generation
 - Implemented real-time search with debouncing for performance optimization
 - Designed scalable React frontend with responsive architecture
-

Food Ordering App – Frontend System Design (Swiggy Clone)

GitHub: <https://github.com/Rohitsaini0444/food-ordering-app>

- Developed responsive food ordering UI using React.js and Tailwind CSS
 - Built reusable component architecture for scalability
 - Implemented restaurant listing, menu browsing, and cart system
 - Optimized rendering performance and frontend state management
-

KEY ACHIEVEMENTS

- Improved backend system performance by up to **40% through caching and database optimization**
 - Designed and delivered **microservices-based enterprise systems**
 - Built real-time applications using WebSockets for live updates
 - Implemented Docker-based containerization with cloud deployment on AWS and Azure
-

EDUCATION

B.Tech in Computer Science & Engineering
College of Engineering & Technology, Bikaner
2013 – 2017
